at the Corner of Pine Street.

There is an immense hole, 15 feet long by 10 feet wide, in the centre of Broadway. the corner of Pine street. Clouds of dense white steam are issuing from the excava-tion, and pedestrians on either side of Broadway who are compelled to pass this

vaporous cavity. The place is the scene of the latest blow up of the steam company's mains. They happen regularly every other day new, and the young man who intends taking his best wirl out Sunday would better give Broadway, from Chambers to Whitehall streets, a

wide berth. Last night's geyser spouted about o'clock. A hissing column of steam sud-denly shot up in the air with a rosr, and fine particles of sand and mud were liberally deposited in the eyes and ears and upon the garments of those who happened to be near.

The paving stones were loosened for a distance of three or four feet around the spouting column, and the steam was so dense that it was impossible to see across the Pedestrians first swore and then fled in all

directions, fearfully expecting that a shower of paving-stones and manhole covers would possible to drive even the oldest warhorses of the Broadway line through that hot.

their interiors, saturating the clothing of
the passengers with the disgusting gases
that were forced from the earth by the
steam.

A policeman sent word to the steam company's office, and a gang of men were sent
to the spot. They ripped up the paving
and went to work with pick and shovel. It
was after midnight when they reached the
bis pipe, and after tinkering it swhile they
concluded that the public could stand a
little steam for another twenty-four hours,
and went home.

This morning it was nearly as bad as when
the explosion took place. Big clouds of
steam were rolling from the excavation and
filling the sir with horrible stanches.
